

InfiNiTiCoat™

Lubricious Coating Solution

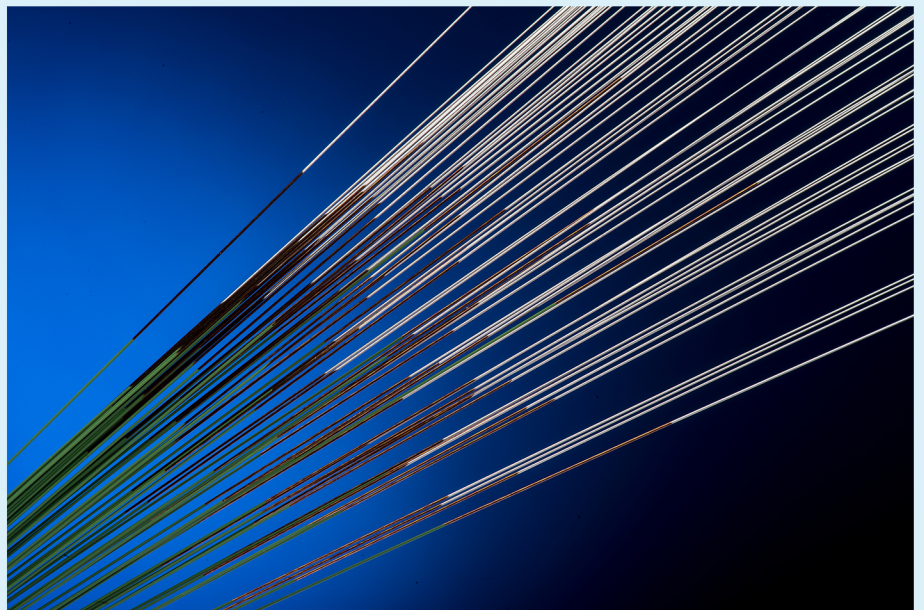

InfiNiTiCoat™ is a proprietary low-temp coating process, optimized for **lubricious** coating performance on **nitinol** substrates within the **Interventional & MIS** markets.

Applications

- PTCA Catheter Pushers
- Retrieval Baskets
- Graft Support Systems
- Cannulated Needles
- Hypotubes
- Dental Arch Wires
- And many other nitinol medical devices

Solution for

- Lubricity
- Supply Chain Management

Advantages

- Ideal for **nitinol wires** used in neurovascular, urologic, endoscopic, & other procedures based on nitinol's super-elastic and shape-memory properties.
- Our proprietary formulation ensures **excellent release & low friction**.
- InfiNiTiCoat **preserves the characteristics of nitinol** in wire, strip, & tube forms.
- Precision Coating has **unique process control** over challenging nitinol handling, coating, and curing.

Our facility in **Costa Rica** allows Precision Coating to be closer to our customers & simplify the complex **supply chain** from weeks to days.
